

As Unitarian Universalists we covenant to affirm and promote:

- *The inherent worth and dignity of every person;*
- *Justice, equity, and compassion in human relations;*
- *Acceptance of one another and encouragement to spiritual growth in our congregations;*
- *A free and responsible search for truth and meaning;*
- *The right of conscience and the use of the democratic process within our congregations and in society at large;*
- *The goal of world community with peace, liberty, and justice for all;*
- *Respect for the interdependent web of all existence of which we are a part.*

Inspired by many sources, we seek truth and grow in spirit.

Our Living Traditions include:

- *Direct experience of that transcending mystery and wonder, affirmed in all cultures, which moves us to a renewal of the spirit and an openness to the forces which create and uphold life;*
- *Words and deeds of prophetic women and men which challenge us to confront powers and structures of evil with justice, compassion, and the transforming power of love;*
- *Wisdom from the world's religions which inspires us in our ethical and spiritual life;*
- *Jewish and Christian teachings which call us to respond to God's love by loving our neighbors as ourselves;*
- *Humanist teachings, which counsel us to heed the guidance of reason and the results of science, and warn us against idolatries of the mind and spirit.*
- *Spiritual teachings of earth-centered traditions, which celebrate the sacred circle of life and instruct us to live in harmony with the rhythms of nature.*

Upcoming Service

July 19, 2026 • "Physical Landscapes: Art and Science in the Work of Martyl" with Dr. Isaiah Bertagnolli

Now hanging at the Unitarian Church in Evanston, Illinois is a painting of the Big Bang. Darkness Into Light (1961) was painted by the artist Martyl Langsdorf (1917-2013). The mural was a spiritual-ecological statement about the human being's intrinsic connections to the universe when the threat of nuclear war loomed large. Martyl was keenly aware of the nuclear threat. Her husband was a Manhattan Project physicist. She served as the arts editor for the pro-disarmament public policy journal The Bulletin of the Atomic Scientists, and designed their iconic Doomsday Clock in 1947. This presentation examines how Martyl painted physical phenomena like the Big Bang, particle wave duality, and planetary relativity to challenge the masculinist culture of the men who built the bomb.

Welcome! If you are visiting, we invite you to fill out a GUEST CARD you will find in the seatback in front of you. Please join us after the service for coffee, tea, and conversation.
